

# Voice Biometrics for Healthcare Providers

Prevent medical identity theft and the privacy of healthcare data with a secure and convenient authentication experience for physicians, patients, and partners

## Why VoiceTrust?

We are a market leader in voice-based identity verification solutions with high-profile customers, cutting-edge technology, and a reputation for the successful delivery of projects worldwide since 2000. Global Fortune 500 clients rely on our solutions to securely and conveniently authenticate millions of their users.

## Benefits for Healthcare Providers

### Secure Access to Health Data Privacy

Secure access to health records and maintain the privacy of medical data to comply with regulations such as HIPAA, HIPA, and the Data Protection Act. Voice biometrics demonstrates security compliance by ensuring only authorized individuals can access sensitive data, whether it is a physician reviewing electronic health records on their tablet or a patient viewing test results online.

### Prevent Medical Identity Theft

Medical identity theft and fraud affects millions of individuals around the world and costs the healthcare industry billions of dollars each year. Voice biometrics provides strong authentication that goes beyond PINs and passwords to protect your organization against identity theft and its associated costs.

### Deliver A Convenient Authentication Experience

Your patients and physicians prefer voice authentication over PINs, passwords, and security questions. Save them from having to remember multiple complex passwords that are easily forgotten, shared, or stolen. Make identity verification faster and more secure by authenticating people based on who they are, not what they know.

## Solutions for Healthcare Providers

### Password Reset

Automate routine password resets for your physicians, patients, and healthcare partners to make the experience more secure, convenient, and cost-effective.

- Securely reset passwords anytime from anywhere
- Deliver a convenient voice authentication experience
- Save an average of \$5-\$15 for each reset request

### Caller Authentication

Prevent medical identity theft and insurance fraud in your call center with a layer of voice biometrics security. Make authentication faster and immune to social engineering techniques used by fraudsters, which cost the healthcare industry billions per year.

- Automatically verify caller identity using their voice patterns
- Securely authenticate customers without PINs and passwords
- Deliver a faster and more convenient identity verification experience

### Voice Login

Protect access to healthcare applications on the mobile, web, and desktop using voice authentication to verify the identity of your users. Voice login overcomes the security threat of stolen credentials to provide:

- More secure application logins for your patients and physicians
- Stronger identity verification than usernames and passwords
- A more convenient and natural user authentication experience

## About VoiceTrust

We provide voice authentication solutions that prevent fraud, eliminate identity theft, and make application logins more secure. Fortune Global 500 clients including banks, insurance companies, call centers, and enterprises rely on our solutions to verify the identity of millions of users. Founded in 2000, the privately-owned company is headquartered in Toronto, Canada with additional offices in the USA, Germany, and UAE.
